

ABSTRAK

Penelitian berikut dilakukan guna memberikan bukti empiris terkait dampak tata kelola terhadap performa emiten industri farmasi dengan adanya fenomena yang terjadi di Industri Farmasi pada Agustus tahun 2022. Data sekunder yang digunakan bersumber dari data yang terdapat di Bursa Efek Indonesia dan S&P Capital IQ. Hasil akhir dari proses pemilihan sampel, menghasilkan 8 emiten farmasi yang terdaftar dalam Bursa Efek Indonesia pada periode 2016 - 2022 menjadi sampel penelitian

Data yang digunakan dalam penelitian ditelaah menggunakan analisis regresi data panel. Hasilnya membuktikan bahwa kualifikasi dan pengalaman komite audit memberikan dampak positif signifikan terhadap performa perusahaan yang diwakili oleh *operating profit growth*. Disisi lain, kualifikasi & pengalaman dewan direksi di bidang manajemen dan kualifikasi dan pengalaman direksi di bidang farmasi memberikan dampak negatif signifikan terhadap performa emiten. Sementara, dewan komisaris independen, komite audit independen dan masa jabatan dewan tidak memberikan dampak signifikan terhadap performa perusahaan.

Kata Kunci : Tata Kelola Perusahaan, Farmasi, Performa Perusahaan.

ABSTRACT

The following research was carried out to provide empirical evidence related to the influence of corporate governance on the performance of pharmaceutical companies in the presence of a phenomenon that occurred in the pharmaceutical Industry in August 2022. The secondary data used is sourced from the Indonesian Stock Exchange and S&P Capital IQ. The final results of the sample selection process resulted in 8 pharmaceutical companies listed on the Indonesian Stock Exchange in the 2016-2022 period being the study sample.

Data used in the study were reviewed using panel data regression analysis. The results prove that the qualifications and experience of the audit committee have a positive significant impact on the performance of the company represented by operating profit growth. Furthermore, qualifications & experience of the board of directors in the field of management and the qualifications and experience of the directors in the field of pharmacy have a negative significant impact on corporate performance. In contrast, the Independent board of commissioners, the Independent audit committee, and board tenure did not have a significant impact on company performance.
